

THE STARMIX BATRIX

CORDLESS M CLASS

VACUUM EXTRACTOR

FILTER CLASS

The first cordless wet and dry vacuum cleaner with giant power. For the first time, a wet/dry vacuum cleaner with rechargeable battery manages the **power of a mains vacuum cleaner**.

Up to 100 minutes running time (with 2 x 18V 10.0 Ah batteries)! The 3-stage power regulation makes longer battery runtimes possible at the same time. For vacuuming directly on the power tool for drilling, milling, grinding and sawing work, concrete, plaster, stone, cement, paint (hazardous dust, **dust class "M"**). Perfect for use on the construction site and in the workshop.

With the new cordless starmix Batrix, developed on ISC basis, you are independent everywhere. The vacuum for short, hard jobs in boost mode or longer jobs in eco/low mode - flexible and mobile. Perfect for vacuuming on power tools or for floor cleaning work.

With Smartfix (rail for systainer connection), 2 velcros, antistatic hose.

For the toughest heavy-duty continuous use.

For connection to the powertool and direct vacuuming during drilling, milling, grinding and sawing, concrete, plaster, stone, cement, wood, paints and varnishes (hazardous dust, dust class "M"). A highly intelligent electronics measure the current occupancy state of the filter (pressure difference measurement "PDM").

The electromagnetic pulse filter cleaning cleans the filters during the work break, so that afterwards suction can be continued with unchanged high air flow.

Once the factory preset vacuum value is reached, both of the filters are alternately cleaned within 3.5 seconds using high performance electromagnets, without interrupting work. Even the most fine and problematic particles of dusts - such as plaster - can be easily removed from the filters.

Benefit: cleaning according to requirements at constantly high air flow, significantly reduced system costs due to longer filter life, saves time and costs.

Doesn't incl. Wand Kit & Batteries

MV-SM36-18V
SSP £799.00 +vat

Wet/dry vacuum cleaner, dust retention capacity min 99.9% according to dust M class.

Specification

Power Take-Off	No
Capacity	25 Litre
Wet & Dry	Yes
Warranty	12 months
Dimensions	450 x 400 x 575mm
Noise Level	69 dB
Weight	12.5 Kg
Voltage	36V (1x 36V / 2x 18V) Volt
Charging Time	75 mins
Running Time	Low-mode: approx 100 min Eco-mode: approx 34 min Boost-mode: 21 min (with 2x 18V 10 Ah batteries)
Air-Flow (max)	67 l/s
Depression	240 mbar
Filter Cleaning	iPulse Automatic in rest
Filter Type	M-Class
